Objective

Aspiring software engineer with hands-on experience in building scalable, user-centric web applications. Passionate about front-end and back-end development, problem-solving, and writing efficient code. Seeking to contribute my skills in full-stack development to innovative projects at Mukuru, while growing in a collaborative and challenging environment.

Profile

A dedicated software engineer with expertise in front-end development and a growing proficiency in back-end development. Skilled in building responsive, interactive web applications using JavaScript, React.js, Next.js, and Node.js. Familiar with API integration, databases, and modern software development practices. Strong analytical and problem-solving abilities, with a passion for learning and innovation.

Technical Skills

Programming Languages & Frameworks:

- Front-End: HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS, Flexbox · JavaScript Frameworks: React.js (Intermediate), Next.js (Beginner) · Back-End: Node.js, Express.js (Basic)
- Databases: MongoDB, Firebase
- APIs: RESTful APIs, Fetch API, Axios
- Version Control: Git, GitHub

Development Tools & Soft Skills:

- Responsive Design, UI/UX Fundamentals, Figma
- Problem-solving, Team Collaboration, Communication
- Agile Methodologies, Code Reviews, Debugging

Experience

Junior Front-End Developer (Intern)

HexSoftware and Uncommon.org Harare | August 2024 – November 2024

- Assisted in the development and maintenance of client websites, ensuring high-quality, responsive designs.
- Collaborated closely with senior developers to implement interactive UI components and enhance user experience.
- Participated in code reviews and debugging sessions, contributing to improved code quality and performance.

Freelance Web Developer

Self-Employed | 2024–Present

- Designed and developed custom websites for small businesses, improving their online presence and user engagement.
- Utilized React.js and Next.js to create dynamic, interactive web applications. · Managed version control and collaboration using Git and GitHub.

Developer

Dzikwa Trust | 2024 – Present

- Developed a community portal to streamline resource sharing and communication.
- Improved website performance and optimized page load times.
- IT programmer teacher

Projects

Personal Portfolio Website

- Built a fully responsive and modern portfolio using React.js and Next.js. · Implemented dynamic routing, code-splitting, and lazy loading for faster performance.
- Designed with mobile-first principles and improved SEO

ranking. ### E-commerce Platform

- Developed an e-commerce platform with React.js featuring product listings, a shopping cart, and payment gateway integration.
- Optimized for performance and user-friendly navigation.
- Collaborated on UI/UX design and ensured cross-browser

compatibility. ### Blog Platform

- Created a blog application with user authentication, CRUD functionality, and a responsive UI.
- Used React.js, Context API, and Firebase for real-time data

updates. · Implemented secure authentication and efficient data management.
